Patent Claims

1. Gearbox with an actuating device for automated shifting and selection of a gear ratio, the gearbox having a gearbox operating element which is arranged to set the gear ratio and can be activated by means of an operating actor.
2. Gearbox with an actuating device for automated shifting and selection of a gear ratio, the gearbox having a gearbox operating element which is arranged to set the gear ratio and can be activated by means of an operating actor, the operating actor having a drive with a drive output element which, in response to a swivel movement of the drive output element, carries out a movement to engage a gear ratio or select a shift slot and at the same time acts upon a force accumulator which activates an intermediate element to operate the gearbox operating element for selection or shifting, the activation of the intermediate element being limited to a predetermined position by means of at least one retaining element.
3. Gearbox according to claim 1 or 2, characterized in that the gearbox operating element is a central shifting shaft, by means of which on axial displacement of the shifting shaft, engagement of a gear ratio and, on rotation of the gear shaft, selection of a shift slot can be carried out.
